ounces of water.

- Only a 2% drop in the amount of water in your water can bring on mental confusion such as short-term memory loss, being unable to focus and forgetting how to do simple math calculations.

This web site is not intended as medical advice. Rather they are meant to demonstrate that aging can be slowed and even reversed and that Great Health can be achieved when the most fundamental nutritional and water needs of the human body are sufficiently met. Always consult a medical doctor or other medical professional when you consider it necessary.
