

to the presence of excess calcium. By applying acidic (soft) ionized water to the skin it will help to clear up excess bacteria (reduce acne and other blemishes) and will work like an astringent to tighten up the skin and remove wrinkles. In Japanese hospitals acidic water is used to help sterilize wounds, treat diabetic ulcers and keep hospitals clear of infectious bacteria and viruses. Acidic ionized water can also be used to reduce inflammation and itchiness caused by insect bites.

Tell me why the new patented Biostone Filters in the Jupiter Melody, Microlite, Aquarius and Orion create a better ionized water than any other filter.

BENEFITS of ALKALINE WATER CONSUMPTION

For viewers not familiar with pH scales, pure acid is pH 0. Neutral (neither acid nor alkaline) is pH 7. Pure alkaline is pH 14.

- pH 7 is ten times more alkaline than pH 6.
- pH 8 is 100 times more alkaline than pH 6
- pH 9 is 1,000 times ore alkaline than pH 6

For a little perspective, a well known cola is pH 2.5, meaning it is over 10,000 times more acid than neutral tap water, and 100,000 times more acid than your blood (pH 7.4)

The Jupiter Ionizers in the **IonLife** range produce **alkaline water** in the range of pH 7.5 up to pH 11, depending on the setting you choose.

Low settings: First time drinkers, children, pets.

Medium settings: Experienced drinkers, tea, coffee, beverages, hangovers and jet lag rehydration

High Settings: Experienced drinkers, soups, casseroles, pasta.

If detox symptoms are experienced as being too intense then reduce the level of alkaline pH.
